

Reporting

When a participant completes an assessment, the results are stored in Perception's answer database. Administrators can then view these via a browser. Perception offers ten pre-defined report styles but you can also define your own reports. Answers can also be exported to Excel for custom reporting and can integrate with third-party system.

Pre-defined, Customizable Reports	Perception	Competitive Product
Item Analysis Report: Graphic displays showing distribution of discrimination, correlation, p-value, difficulty, outcome frequency, participant mean, times occurred (frequency), proportion selected, upper group selection, lower group selections, outcome discrimination, outcome correlation, mean of P value, proportion correct, mean of item discrimination, mean of item total correlation, and participant comments.	Yes
