

Questionmark SAP Connector

Link Questionmark™ Perception™ to SAP's Learning Solution for More Effective Recruitment, Certification and Alignment of Skills to Organisational Objectives

Overview

SAP Enterprise Learning integrates business processes, content development, and the delivery of learning linked to employee performance. It incorporates back-office ERP functionality with both a learning management system (LMS) and a learning content management system (LCMS), providing an enterprise learning platform capable of managing and integrating business and learning processes. Questionmark's SAP Connector enables customers using the SAP Enterprise Learning environment to leverage and complement SAP's human capital management solution with Questionmark Perception's assessment management capabilities.

How it works

The SAP Connector links the SAP Enterprise Learning environment to Questionmark Perception. Assessments in Questionmark Perception can be scheduled from the SAP Enterprise Learning environment. A learner will be able to launch the scheduled assessment from the SAP Learning Environment portal. The assessment is delivered by Perception which, upon completion of the assessment, passes results based to the SAP Enterprise Learning.

Technical Requirements

- Questionmark Perception Server 4.3+
- SAP Enterprise Learning 3.00 or above

Benefits

- A streamlined connection between SAP Enterprise Learning and Questionmark™ Perception™
- Organisations using SAP Enterprise Learning can take full advantage of the powerful and innovative assessment management features offered by Perception. These include Questionmark Secure, which provides secure delivery of high-stakes exams and can minimise cheating by "locking down" the participant's PC, preventing task-switching, printing, screen captures, and more.
- Include assessments in the course catalogue.
- Allows billing for assessments
- Allows you to give feedback within Perception at the detailed topic level
- Instructors and trainers who need comprehensive question types, such as drag-and-drop and hot-spot, with a pedagogical focus, can provide all styles of assessments within their course.
- Organisations can access Perception's full range of reporting features, including Item Analysis, Test Analysis, Question Statistics, and more.
