

Connector for SAP® Learning Solution

Link Perception to SAP's Learning Solution for More Effective Recruitment, Certification and Alignment of Skills to Organizational Objectives

Overview

SAP Enterprise Learning integrates business processes, content development, and the delivery of learning linked to employee performance. It incorporates back-office ERP functionality with both a learning management system (LMS) and a learning content management system (LCMS), providing an enterprise learning platform capable of managing and integrating business and learning processes. Questionmark's connector for use with SAP enables customers using the SAP Enterprise Learning environment to leverage and complement SAP's human capital management solution with Questionmark Perception's assessment management capabilities.

How it works

The SAP Connector links the SAP Enterprise Learning environment to Questionmark Perception. Assessments in Questionmark Perception can be scheduled from the SAP Enterprise Learning environment. A learner will be able to launch the scheduled assessment from the SAP Learning Environment portal. The assessment is delivered by Perception which, upon completion of the assessment, passes results based to the SAP Enterprise Learning.

SAP® Certified

Questionmark Perception 5.2 assessment management system has achieved certified integration with SAP® applications, bringing Questionmark's comprehensive assessment authoring, scheduling, delivering and reporting capabilities to users of SAP software. The SAP Integration and Certification Center (SAP ICC) has certified that Questionmark Perception 5.2 successfully integrates with the SAP Learning Solution via SAP's external learning services 300 (LS-ELS 300) integration scenario.

SAP® Certified
Integration with SAP Applications

Benefits

- A streamlined connection between SAP Enterprise Learning and Questionmark™ Perception™
- Organizations using SAP Enterprise Learning can take full advantage of the powerful and innovative assessment management features offered by Perception. These include Questionmark Secure, which provides secure delivery of high-stakes exams and can minimize cheating by "locking down" the participant's PC, preventing task-switching, printing, screen captures, and more.
- Include assessments in the course catalog
- Allows billing for assessments
- Allows you to give feedback within Perception at the detailed topic level
- Instructors and trainers who need comprehensive question types, such as drag-and-drop and hot-spot, with a pedagogical focus, can provide all styles of assessments within their course.
- Organizations can access Perception's full range of reporting features, including Item Analysis, Test Analysis, Question Statistics, and more.

Technical Requirements

- Questionmark Perception Server 4.3+
- SAP Enterprise Learning 3.00 or above
- For more details, see the following [knowledge base article](#).
