Questionmark for Cornerstone customers

Assessment solutions that ensure competence, compliance, and competitiveness

From high-stakes certifications to skill-based L&D, Questionmark enables organizations to measure and prove skills, compliance, and knowledge with modern assessment capabilities, actionable data, and expert support.

With Questionmark, you can manage the entire assessment lifecycle from authoring through to scoring, enabling you to deliver global assessment programs that prove what your team can actually do

Keep your organization competent, compliant, and competitive with enterprise-grade assessment solutions trusted by industry-leading organizations.

Capability	Cornerstone	Cornerstone + Questionmark
Focus	Learning reinforcement, knowledge checks, engagement	High-stakes, defensible assessments for compliance and certification
Integration	Native inside LMS	Fully integrated (SSO, SCORM, AICC, API) for a seamless learner experience
Security	Basic quiz controls	Includes a range of proctoring options, passcode protection capabilities & locked-down browser
Analytics	Scores, completions, survey analytics	Reports, including participant, assessment, question, course, and feedback
Use Case	Low-stakes learning	High-stakes compliance, licensure, external audits

Why Cornerstone customers choose Questionmark

With Questionmark assessments integrated with Cornerstone, customers benefit from:

- **Skill-based & audit-ready testing options,** including observational, video, and unfolding scenario-based assessments that measure and prove compliance and competence.
- **Full interoperability with Cornerstone** via AICC, SCORM, LTI, and SAML, ensuring a seamless and centralized learning experience.
- **Flexibility to support any assessment use case,** including mixed-format, randomized tests, and media-rich assessments.
- **A comprehensive reporting suite:** Surface performance data at every level and easily create and share dashboards.
- **Tools to safeguard test integrity,** including a range of flexible proctoring options, secure browser functionality, and ID verification.
- **Native accessibility,** including 36 authoring languages, 30+ delivery languages, and WCAG-compliant responsive design for inclusive testing worldwide.
- **Security from the ground up:** ISO 27001 certified, GDPR compliant, and FedRAMP authorized.
