Integrate with Enterprise Systems

Automate Business Processes

Turnkey Assessment Solutions

Overview

Organizations that want to optimize their assessment programs and increase their relevance to the entire enterprise rely on Questionmark Consulting Services, which gives them the help of experts in systems integration, server installations, instructional design, analytics and psychometrics.

Questionmark's technologies and services combine to yield effective real-world solutions for regulatory compliance, certification program management, channel verification and successful learning outcomes.

Accelerate Time to Deployment

When time is of the essence, Questionmark's Consulting Services team can get your assessment system and content up and running – fast. Questionmark's services can work with you to strategically plan your deployment, install and configure your server, migrate your legacy content to your new platform, and work with you to produce new assessment content.

Automate Business Processes

We help you work more efficiently by providing self-registration systems and automating assessment administration and delivery. We can also provide customized and push reporting systems that enable you to analyze assessment results and deliver reports in ways that are most suitable for your organization. Custom administration modules help you automate scheduling and synchronize participant management with your other internal systems.

Use Psychometrics to Your Advantage

We offer specific guidance for important assessments such as employee knowledge checks, certifications, and tests related to regulatory compliance, providing psychometric services including item analysis, item selection and validity studies.

Turnkey Assessment Solutions

Questionmark consultants can help you design, create and deploy your assessments or create items and assessments for you. You can help ensure the quality as well as the efficiency of your assessment program by working with Questionmark Consulting Services. Test development, psychometric services, defensibility audits and data mining are among the many ways in which we can help ensure that your assessments meet organizational goals as well as regulatory requirements. For organizations transitioning to a new assessment delivery environment, we also offer quick, reliable turnkey assessment solutions.

Integration

Integrating your assessment management system with other key enterprise systems can yield tremendous benefits such as streamlining processes, simplified administration and improved security. Through our longtime support of industry standards, web services APIs, and "Connectors", Questionmark can provide a variety of ways to seamlessly integrate Perception with your LMS/CMS systems. Questionmark Consulting Services take the guesswork out of executing effective integrations such as:

- Single Sign-on
- Launch and track
- Automate assessment scheduling
- Synchronize result records between Perception and your data warehouse.

Consulting On-Site or Online

Deployment and integration assistance is available by telephone or on-site. Telephone assistance is recommended for customers with small pilot programs or tight budgets.
