

Military Solutions - Testing and Survey

Assessment Management Solutions for Job Task Analyses, Competencies, Distance Learning and More

Overview

The size and mobility of military forces and their use of complex technological systems put them on the cutting edge of learning. The Questionmark® Perception® assessment management system is widely used in the U.S. defense community for a range of applications. These include:

- Surveys and course evaluations
- Post-course tests for distance learning
- Job task analyses
- Advancement exams
- Competencies for service people who maintain aircraft and watercraft
- Tests for pilots and aircraft engineers
- Medical training

Blended Delivery

With personnel in remote locations, military organizations benefit from a wide variety of delivery options provided by Questionmark:

- Questionmark to Go, which enables service members to take assessments offline while they are deployed offshore or overseas
- Mobile delivery and mobile apps for a variety of devices
- Printing and scanning for the administering paper-based assessments
- Save-as-You-Go, which preserves answers and enables participants to return to an assessment after an interruption and resume where they left off
- Question-by-Question Delivery, which makes it possible to show participants a question at a time
- Observational Assessments to "rate" the performance of a candidate while performing a task
- Feedback to help learners identify areas where they need to focus more attention on learning

Accessibility

Perception assessments delivered online is optimized for screen-reader compatibility and support navigation using the keyboard or alternate pointing devices. Participants can easily toggle text size and contrast controls in online assessments.

Secure Testing

- Security options including Questionmark, Secure, which locks down the participant's desktop to prevent task switching
- Monitors functionality allows for "dual" login for proctored testing environments.
- Partnerships with remote monitoring services including ProctorU and Software Secure.
- Secure authoring environment with workflow for multiple authors and reviewers to work remotely and collaboratively
- Questionmark Live browser-based authoring, which makes it easy to harvest content from subject matter experts
- Strong support for interoperability standards such as SCORM and AICC, which make it possible to launch and track Questionmark assessments via learning management systems and other enterprise systems.

Reporting and Analytics

Questionmark's reporting and analytics provide a powerful, comprehensive and rapid toolset for analyzing and sharing assessment results with stakeholders. Standard reporting includes item analysis, coaching reports, survey, course evaluations analytics and more.

Global Support

- Expert support staff available 24/7
- Support via phone, email and chat
- Extensive help resources, product guides and online user communities

Full-Service Solutions

Questionmark consultants help ensure the quality and efficiency of assessment programs. Through test development, psychometric services, technical consulting and training services we can help ensure that your assessments meet the highest standards.
