

Questionmark and the GDPR

The General Data Protection Regulation (GDPR) is a new European Union privacy law about processing personal data of individuals in the EU. If you are delivering assessments in the EU, you will need to comply with the GDPR even if your organization is based outside of the EU. Questionmark itself will be compliant with the GDPR, and this data sheet explains some of the ways we will help customers using Questionmark OnDemand and Questionmark OnPremise be compliant.

GDPR Compliance Measure	Questionmark follows?	How Questionmark helps:
Only process personal data on your instructions		Questionmark is a data processor under the GDPR. Personal data is only used for operating the service and we erase personal data after you stop using the service. See our privacy policy for more information.
Inform of and gets approval of subcontractors/sub- processors		We disclose the small number of sub-processors we use, and if they change, we follow the GDPR procedure to obtain general authorization from customers.
Contract meets GDPR needs		All our standard contracts are GDPR compliant, and we'll look reasonably at any other contractual needs you have.
Strong security measures to protect personal data		Questionmark is ISO 27001 certified. See www.questionmark.com/trust for details on our security.
Personal data outside the EU is protected		Questionmark is signed up to the EU-US Privacy Shield, has EU model clauses in place with sub-processors and will enter into EU model clauses with customers.
