

Instant Translate

The award-winning translation tool for non-native speakers

Explore how Instant Translate, winner of the ITCC Innovation Award 2022, improves assessments for test takers and organizations alike with advanced machine translations that happen right on screen and in-test.

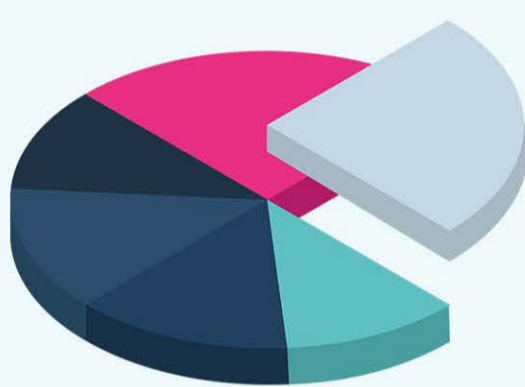

LANGUAGES ARE SPOKEN GLOBALLY

Numerous tests and assessments are taken in a non-native language

RECENT ESTIMATIONS CLAIM THAT **43%** OF THE WORLD IS BILINGUAL AND **17%** IS MULTILINGUAL

The language barrier for non-native speakers in assessments is a huge problem for fair testing and inclusivity, which is why Questionmark launched Instant Translate

FLEXIBLE & AVAILABLE IN 22 LANGUAGES

With Instant Translate from Questionmark, test takers can get instant, on screen & in-assessment translations by simply **highlighting the text** they need translating

"Enabling test-takers to translate a question, or parts of a question, in order to sense check their understanding is a useful way of making assessments more accessible."

John Kleeman,
Founder of Questionmark
